

# Vehicle width dimensions

Cars are becoming wider. To ensure comfortable entry and exit, we recommend choosing platforms with minimum widths of 250 cm for single units and of 500 cm for double units. Even wider platforms of 260 cm and 270 cm are also available for single units. For 405 and 450 double units, platforms of 520 cm and 540 cm are available for higher comfort.

## Vehicle width dimensions

## Door-opening-distance with different platform widths

Dimensions in cm.

The vehicle parking positions and car width dimensions of other vehicle models can vary from those shown above. Therefore, the door opening distances in the diagrams are only provided as theoretical estimations for guidance.
